Session 3
                                                                   Aging
                                                                                                                                                                   Hussein Samhat
                                                                                                                                                                                                                                                                          Bridging the Immunization Gap: Insights into Vaccine Coverage Among Canada's Aging Population
                                                                                                                                                                                                                                                                         Buprenorphine in Substance Use Disorder (SUD) Specialty Settings versus Non-SUD Settings: Trial Emulation using the Veterans Health Administration Data Can we use classification and regression trees to compare cesarean delivery rates across populations?
Session 2
                                       P1125
                                                                   Substance Use
                                                                                                                                                                   Haidong Lu
                                                                   Perinatal & Pediatric
                                                                                                                                                                    Ruby Barnard-Mayers
Session 1
                                                                                                                                                                   Shyfuddin Ahmed
                                                                                                                                                                                                                                                                          Cancer risk, all-cause mortality, and graft failure/retransplantation with belatacept use among kidney transplant recipients in the United States
Session 3
                                      P114
                                                                  Cancer
                                                                                                                                                                   Edgar Ellis
                                                                                                                                                                                                                                                                         Carcinogenic Air Pollutants and Breast Cancer Risk in the Arkansas Rural Community Health Study: A Nested Case-Control Study
                                                                                                                                                                   Natalie DuPre
Augusto César Ferreira De Moraes
                                                                                                                                                                                                                                                                         Carcinogenic Metals and Colorectal Cancer Incidence: Pilot Results from the Louisville Environmental Assessments Pilot Study (LEAPS) in Colorectal Cancer Cardiovascular health is positively associated with a higher total whole brain cortical volume in US adolescents – ABCD Study
Session 2
                                      P1105
                                                                  Substance Use
                                                                                                                                                                   Renzo Calderon Anyosa
                                                                                                                                                                                                                                                                         Causal decomposition to explore disparities in cannabis-impaired Driving: A Sociodemographic and Behavioural Analysis Based on the Canadian Automobile Association (CAA) Surveys in Ontario, 2021-2023
 Session 1
                                       P225
                                                                  Causal Inference
                                                                                                                                                                   Mahwar Etminan
                                                                                                                                                                                                                                                                          Causal Diagrams for Disease Latency Bias
                                                                   Causal Inference
                                                                                                                                                                                                                                                                           Causal Diagrams for Disease Latency Bias
Session 1
                                                                   Aging
                                                                                                                                                                   Zhu Liduzi Jiesisibiek
                                                                                                                                                                                                                                                                          Causal effects of body composition on lifespan: Mendelian rand
Session 2
                                      P482
P506
P512
                                                                   Health Disparities
                                                                                                                                                                   Guohua Li
                                                                                                                                                                                                                                                                         CALISE-SPECIFIC MORTALITY IN PEOPLE WITH ALITISM SPECTRUM DISORDER. LINITED STATES. 1999-2021.
                                                                                                                                                                                                                                                                         Census-Tract Level Social Vulnerability and Preterm Birth in California

Centering Health Equity in Epidemiologic Research: An Introduction to the Health Equity Rese
                                                                                                                                                                     locelyn Burridge
Session 1
                                                                                                                                                                   Dustin Duncan
Session 1
                                      P847
                                                                  Perinatal & Pediatric
                                                                                                                                                                   Giselle Bellia
                                                                                                                                                                                                                                                                          Cerebral Palsy and the Hispanic-Immigrant paradox in California Births From 2000-2015
                                                                                                                                                                                                                                                                         Changes in COVID-19 mortality disparities among people with HIV in Florida after introduction of COVID-19 vaccine.

Changes in gestational diabetes subtypes following a screening change in British Columbia, Canada: an interrupted time series analysis
                                                                   Health Disparities
Perinatal & Pediatric
                                                                                                                                                                  Tendai Gwanzura
Elizabeth Nethery
Session 3
                                      P279
                                                                  COVID-19 Pandemic
                                                                                                                                                                   Changwoo Han
                                                                                                                                                                                                                                                                          Changes in psychological disease incidence patterns during the COVID-19 pandemic: A study using the nationwide health insurance data of Korea
Session 3
                                       P546
                                                                   Health Services/Policy

                                                                                                                                                                  Alena Sorensen D'Alessi
Section 3
                                                                   Reproductive
                                                                                                                                                                   Mandy S. Hall
                                      P492
P251
                                                                   Health Disparities
                                                                                                                                                                   Lauren Mock
 Session 2
Session 1
                                                                  Causal Inference
                                                                                                                                                                   Harrison Hansford
                                                                                                                                                                                                                                                                         Decompression surgery with or without fusion in subgroups with degenerative lumbar spondylolisthesis
                                                                   Pharmacoepide
                                                                                                                                                                                                                                                                         Degaretix and the Risk of Severe Urinary Tract Infections Among Patients Diagnosed with Prostate Cancer: A Population-Based Cohort Study Demographic and Crash Characteristics Influencing the Place of Death in Pedestrian Fatalities
 Specian 2
                                                                                                                                                                   Farzin Khosrow-Khava
Session 2
                                       P614
                                                                   Infectious Disease
                                                                                                                                                                   Saeed Akhtar
                                                                                                                                                                                                                                                                         Demographic disparities in suboptimal uptake of human papillomavirus (HPV) vaccine among female schoolteachers in a middle eastern country: A generalized structural equation modeling approach
Session 2
                                       P554
                                                                   Health Services/Policy
                                                                                                                                                                   Afshin Vafae
                                                                                                                                                                                                                                                                          Depends on whom you ask: discrenancies in reporting spousal care between women and men across Furguean welfare states
                                                                                                                                                                                                                                                                         Depression and external-cause mortality among people engaged in HIV care in an urban clinic 
Depression is purple, but unmet need for treatment is red
                                                                   HIV/STI
                                                                                                                                                                   Han-Chih (Tiffany) Hsiel
                                       P1000
                                                                                                                                                                    Catherine Ettmar
Session 1
                                       P36
                                                                  Aging
                                                                                                                                                                   Sarah Conderino
                                                                                                                                                                                                                                                                         Descriptive epidemiology of New York City older adult patients with multiple chronic conditions
Session 3
                                       P1001
                                                                           rce Communication & Media
                                                                                                                                                                                                                                                                         Desirable properties of public health communication tools on ambient air quality from multi-pollutants for better interpretation 
Determinant of covid-19 vaccination coverage and post-vaccination adverses effects among at-risk people in DRCongo
                                                                                                                                                                   Hwashin Shin
                                                                   COVID-19 Pandemic
                                                                                                                                                                      temy MPULUMBA BADIAMBILE
                                                                                                                                                                                                                                                                          Determinants of Hepatitis C Virus Treatment Completion Among Los Angeles County Residents Diagnosed Between January 1, 2021 and April 30, 2022
Session 3
                                       P608
                                                                                                                                                                  Cassidy Hernandez-Tamayo
Session 3
                                       P851
                                                                  Perinatal & Pediatric
                                                                                                                                                                   Jennifer Dunne
                                                                                                                                                                                                                                                                          Determinants of short interpregnancy intervals
                                       P634
P479
                                                                                                                                                                                                                                                                         Determining the effect of changing training duration on injury risk in adolescent ice-hockey players: target trial emulation 
Development and Validation of a Breast Cancer Risk Prediction model for Puerto Rican women
                                                                   Health Disparities
 Session 1
                                                                                                                                                                   Mary Diaz Santani
Session 2
                                      P1138

Session 1
                                       P1037
                                                                   Social
                                                                                                                                                                       Megan Marziali
                                                                                                                                                                                                                                                                               Housing matters: The impact of housing instability on all-cause mortality among people with HIV in British Columbia, Canada
                                                                                                                                                                       Christina A. Mehranboo
                                                                                                                                                                                                                                                                               Housing stability and firearm violence: A natural experiment utilizing COVID-19 eviction moratoria in the United State 
How do discrepancies between subjective and objective health predict the risk of injurious falls in older Swedish adult
                                                                    Aging
Session 3
                                        P14
                                                                    Aging
Women's Health
                                                                                                                                                                       Ryo Ikesu
                                                                                                                                                                                                                                                                               Hypothetical interventions on loneliness and memory function among middle-aged and older adults in the US
Session 1
                                       P1182
                                                                                                                                                                                                                                                                                Hysterectomy natterns and trends in Mexico, 2010-2019
                                                                                                                                                                                                                                                                               rysace.cum y patients and unless in recover, 2012-2013

Whish that they understood that if a woman is being held hostage by money, she is being held hostage physically: Experiences, Impacts, and Implications of Economic Abuse on Perinatal Peopl Identifying Emerging Issues in Work-related Chronic Disease through Research Partnerships: The NIOSH Chronic Disease Prevention Program
                                                                                                                                                                       Sarah Scott
Session 1
                                        P820
                                                                   Occupational
                                                                                                                                                                       Taylor Shockey
Session 3
                                                                   Big Data/Machine Learning/A
                                                                                                                                                                       Noah Siegel
                                                                                                                                                                                                                                                                               Identifying patterns of tobacco use and associated cardiovascular disease risk through machine learning analysis of urine biomarkers Immigrant-Specific Policies and Programs and Maternal, Perinatal, and Paediatric Outcomes: A Scoping Review
                                                                       Perinatal & Pediatric
                                                                                                                                                                                                                                                                               Impact of a sugar-sweetened beverage tax on non-communicable diseases mortality in Brazil, according to income
Session 1
                                        P553
                                                                   Health Services/Policy
                                                                                                                                                                       Luciana Nucci
Session 2
                                        P362
                                                                   Environment/Climate Change
                                                                                                                                                                       Aleksandra Stampe
                                                                                                                                                                                                                                                                               Impact of climate variability on projected influenza outbreaks
                                        P950
P961
                                                                                                                                                                                                                                                                               Impact of ones on perceived and actual health outcomes in living kidney donors in the western region of Saudi Arabia 
Impact of Gestational Age Measurement Technique on Estimated Associations of Maternal Age and Body Mass Index (BMI) with Birth Outcomes
                                                                    Renal transplantation
                                                                                                                                                                       Emity Heaphy
Ginna Doss
 Session 2
                                                                     Reproductive
Session 3
                                       P513
                                                                   Health Disparities
                                                                                                                                                                       DR ASHISH SINHA
                                                                                                                                                                                                                                                                               Impact of health seeking behavior on Pulmonary TB care in Raigur District of Chhattisgarh province India: Community based study
                                                                                                                                                                                                                                                                               Impact of Preoperative Frailty and/or Sarcopenia on Postoperative Outcomes in Adults with Degenerative Cervical Myelopathy.
Session 3
                                        P743
                                                                   Methods/Statistics
                                                                                                                                                                       Rikki Fan
                                                                                                                                                                       Hussein Samhat
                                                                    Neurology
                                                                   Health Services/Policy
Session 3
                                         P550
                                                                                                                                                                       Daniel Flanagan
                                                                                                                                                                                                                                                                               Impact of South African child support grant on child health: longitudinal evidence from 2008-2017
Session 3

P771
                                                                                                                                                                                  Stephen Hunter
Pascal Geldsetzer
Session 3
                                                                        Neurology
Session 2
                                          P510
                                                                        Health Disparities
                                                                                                                                                                                   Akaninyene Noah
                                                                                                                                                                                                                                                                                                    The Effect of Social Deprivation on Adverse Pregnancy Outcomes
                                                                                                                                                                                                                                                                                                    The Effect of Time Since First Dose of Measles-Munps-Rubella (MMR1) Vaccine on Measles Immunity
The Effect of Time Sonce First Dose of Measles-Munps-Rubella (MMR1) Vaccine on Measles Immunity
The Effects of Time South African Older Person's Grant on Food Expenditure Among Rural Older Adults; Findings from The Population-based HAALSI Study
Section 1
                                                                         Infectious Disease
                                                                                                                                                                                   Archchun Arivaraia
                                          P24
P231
                                                                                                                                                                                   Haeyoon Chang
 Session 2
                                                                         Aging
                                                                        Causal Inference
Session 3
                                                                                                                                                                                   Douglas Weed
                                                                                                                                                                                                                                                                                                    The Ethics of Causal Claims
                                                                                                                                                                                                                                                                                                    The factors Associated with Sexually Transmitted Infections (STI) Screening among Women in the United States.

The Impact of Pre-Pregnancy Obesity on the Relationship between COVID-19 Infection and Preeclampsia and Eclampsia in South Carolina (2020-2022)
 Specion 1
                                           P573
                                                                         HIV / STI
                                                                                                                                                                                   SHII DA DATII
                                                                          Women's Health
                                                                                                                                                                                   Sarah E. Simpson
Session 2
                                           P123
                                                                        Cancer
                                                                                                                                                                                   Lu Zhang
                                                                                                                                                                                                                                                                                                    The impact of Medicaid expansion on non-small cell lung cancer diagnosis, survival, and disparities
                                                                                                                                                                                                                                                                                                   The Impact of Short-Term Exposure to Volatile Hydrocarbons on Fertility Perspectives from the Guld Study

The Impact of Short-Term Exposure to Volatile Hydrocarbons on Fertility Perspectives from the Guld Study

The Impact of Uninessure of Confounding on the Association between Hastard Periodontias and Adverse Birth Outcomes. Meta-Analyses of Observational Studies

The Impact of Short-Term Exposure to Volatile Hydrocarbons on Fertility Perspectives from the Confounding 
Session 1
                                           P811
                                                                         Occupational
                                                                                                                                                                                   Rehecca Noga
                                                                        Reproductive
Health Disparities
                                                                                                                                                                                   Abdullah Al-Taia
                                           P508
                                                                                                                                                                                   Akpevwe Amanda Ojaruega
Session 1
                                           P967
                                                                        Reproductive
                                                                                                                                                                                  Kelly DeBie
                                                                                                                                                                                                                                                                                                    The Influence of Reproductive Access Restrictions on Out-of-State Abortion Care in Colorado, an Interrupted Time Series Analysis 2018-2023
Session 3
                                                                        Policing/Incarceratio
Cardiovascular
                                                                                                                                                                                  Erin C. McCanties
                                                                                                                                                                                                                                                                                                   The Mediation Effect of Social Support on the Relationship Between Psychological Distress and Grafitude, Life Statisfaction, and Resilience following Hurricane Katrina The Metabolic Vulnerability Index as predictor of Major Cardiovascular Adverse Events in the ELSA-Brasil Cohort
Session 2
                                           P760
                                                                         Molecular
                                                                                                                                                                                   Vandrize Meneghin
                                                                                                                                                                                                                                                                                                    The metabolic vulnerability index in subclinical hypothyroidism; a cross-sectional analysis from ELSA-Brasil
Session 3
                                          P713
                                                                         Methods/Statistics
