## Poster Session 2, Wednesday, June 19, 2024

		Poster Session 2, Wednesday, June 19, 2024		
		6:30 - 7:30 pm		
Poster Number 2	Primary Category Aging	Title Association between birthweight and cognitive function in middle-aged adults: the Bogalusa Heart Study	Presenting Author Eunsun Gill	Author Status Student/PostDoc
2	Aging	Association between on intervegin and cognitive function in minour-agent autors, the bogatosa real social Examining the Associations of Social Support and Chronic Stress on ADRD Plasma Biomarkers in the Health and Aging Brain Study-Health Disparities (HABS-HD) Cohort	Jillian Lee	Student/PostDoc
6	Aging	Loneliness and Social Isolation among Older Asian Indian Immigrants in the United States	RoiSan Nhpang	Student/PostDoc
9	Aging	Title: Association of perceived neighborhood social characteristics with cognitive function and decline in the Health and Retirement Study	Xu Zhang	Student/PostDoc
22	Aging	Cognition function and its relationship with cerebral ageing signs detected by high-resolution magnetic resonance: preliminary findings from the ELSA-Brasil	Alessandra C Goulart	
24	Aging	The Effects of The South African Older Person's Grant on Food Expenditure Among Rural Older Adults: Findings from The Population-based HAALSI Study	Haeyoon Chang	Student/PostDoc
26 27	Aging	Five year trajectories of the mental and physical SF-36 summary scores in men: results from the PREADVISE trial	Xiuhua Ding Keija Zhang	Student/PostDoc
35	Aging Aging	Association between Midlife Intake of Ultra-processed Food and Later-life Subjective Cognitive Complaints among Older Women Does healthy behaviour make you look good?	Kejia Zhang Zhu Liduzi Jiesisibieke	Student/PostDoc
38	Aging	Unraveling the Nexus: Social Isolation, Loneliness, and Pain Outcomes in Older Adults	Yulin Yang	Student/PostDoc
40	Aging	How do discrepancies between subjective and objective health predict the risk of injurious falls in older Swedish adults?	Bill Calvey	Student/PostDoc
43	Aging	Redlining, race, and cognition within the Health and Retirement Study	Jenna Rajczyk	
47	Aging	Social integration and subsequent disability in older adults from California	L. Paloma Rojas-Saunero	Student/PostDoc
68	Behavior	Mortality Risk Reduction and Smoking Cessation among Older Population with Long-term Smoking History	Shimin Chen	Student/PostDoc
71 81	Behavior Big Data/Machine Learning/Al	Mutual causal relationship between food intake and regular meal behaviors among socioeconomically disadvantaged children and youth: An evidence-based longitudinal study from 2009 to 2017 in Taiwan Use of generative adversarial networks to create synthetic data	Yueh-Ting Lai Havden Smith	Student/PostDoc
84	Big Data/Machine Learning/Al	Ose or generative aversariai networks to cleate synthetic data Neural Networks for the prediction of neonatal mortality in Rio de Janeiro State, Brazil	RENAN MORITZ VARNIER R ALMEIDA	Student/PostDoc
89	Big Data/Machine Learning/Al	Neuron increases in the production of increases in the operative of the association between cross-sectional measures of BMI and osteoarthritis in the UK Biobank	Patrick Carry	stadenyrostooc
91	Big Data/Machine Learning/Al	Text Classification Models for Natal Sex Identification from Electronic Health Records of Transgender Population	Qi Zhang	Student/PostDoc
95	Big Data/Machine Learning/Al	Machine Learning and racial disparities in health	Keisyanne de Araujo Moura	Student/PostDoc
97	Big Data/Machine Learning/AI	What if we had built a prediction model with a survival super learner instead of a Cox model 10 years ago?	Arthur Chatton	Student/PostDoc
101	Big Data/Machine Learning/Al	Federated learning for health outcomes predictions in a multicentric sample of hospitals	Murilo Bigoto	Student/PostDoc
115 116	Cancer Cancer	Sociodemographic Factors and Financial Toxicity among Cancer Patients and Survivors: A Nationwide Study in Japan Carcinogenic Metals and Colorectal Cancer Incidence: Pilot Results from the Louisville Environmental Assessments Pilot Study (LEAPS) in Colorectal Cancer	Kaori Suga Natalie DuPre	Student/PostDoc
118	Cancer	Calcingent wears and contextal cancer industrie. Find results from the construction mental research and the contextal cancer Spectrum of cancer risk in kishan American, Native Hawaiian, and other Pacific Islander Populations After Solid Organ Transplantation in the United States	lun Tao	Student/PostDoc
121	Cancer	Characteristics of women with metastatic HRY/HR2+ breast cancer in a Kaiser Permanente observational cohort	Sheila Weinmann	stadenyrostooc
123	Cancer	The impact of Medicaid expansion on non-small cell lung cancer diagnosis, survival, and disparities	Lu Zhang	
131	Cancer	Domain-specific physical activity across the life course on the risk of ovarian cancer	Jennifer Ritonja	Student/PostDoc
136	Cancer	The association between protein biomarkers and thyroid cancer in a racially and socioeconomically diverse population in New-York: A nested case-control study	Gary Joseph	Student/PostDoc
142	Cancer	Age-period-cohort modeling of esophageal carcinoma risk in a middle eastern country:1980–2019	Saeed Akhtar	
143 146	Cancer	Application of a Maternal Comorbidity Index to Predict Childhood Cancer Risk: A Population-Based Case-Control Study in Denmark (1977-2013) Association between premenopausal breast density and body composition measures	Tobiloba Adanma Adenekan Sable Fest	Student/PostDoc Student/PostDoc
146	Cancer	Association between Werker MCB dialeties shows a detail of and adory composition measures Adherence to the WCBF/AICE Role dialeties shows and Mortality: A Cohort Study Based on the KoGES-HEXA	Donghyun Won	Student/PostDoc
161	Cancer	Autrentie to use Youry Acc Gaussen animory Earliest animory and write and animory and contract and based on the work Carolina-Louisiana Prostate Cancer Project (PCaP) Longest held occupation, pesticide occupation employment and prostate cancer aggressiveness among Black and White men in the North Carolina-Louisiana Prostate Cancer Project (PCaP)	Carolyn Eberle	Student/PostDoc
163	Cancer	Night shift work and risk of colorectal cancer: results from a prospective cohort study among 56,490 female nurses in the Netherlands	Linske de Bruijn	Student/PostDoc
166	Cancer	Historical redlining and risk of breast cancer in the NIH-AARP Diet and Health Study	Aleah Thomas	Student/PostDoc
170	Cancer	Lung cancer risk update in the US Radiologic Technologists Cohort: Can we revise sex-specific radiation-related risk estimates at low dose-rates?	Cato M Milder	Student/PostDoc
172	Cancer	No Elevated Risk of Cancer in Women of Southeastern Louisiana 12 Years after the Deepwater Horizon Oil Spill	Tyler Prusisz	Student/PostDoc
174	Cancer Cardiovascular	Pre-diagnostic circulating resistin concentrations and mortality among individuals with colorectal cancer: Results from the European Prospective Investigation into Cancer and Nutrition study Circulations and Back Industry and Concentre	Thu Pham Brent Willaims	Student/PostDoc
183 185	Cardiovascular Cardiovascular	Clinical Consequences Post-Implementation of a 5th Generation Cardiac Troponin Assay at an Academic Medical Center in Western Pennsylvania Thyroid peroxidus antibiodies are associated with indirence, but not progression, of coronary artery calification: ELSA-Parasil study	Brent Willaims Vandrize Meneghini	Student/PostDoc
185	Cardiovascular	In your pervaluase analogues of associated with inclusive, out for programming and pervaluase analogues and the adequacy of hypothypothymication treatment with the metabolic vulnerability index.	Vandrize Meneghini	Student/PostDoc
188	Cardiovascular	The role of epigenetic aging in physical activity and cardiovascular mortality	Judy Fan	Student/PostDoc
193	Cardiovascular	Mortality Burden of Atherosclerotic Cardiovascular Diseases and Associated Risk Factors in Taiwan: 2000-2020	Fang-Wen Nora Lu	
			rang-wen wora Lu	
198	Cardiovascular	Cardiovascular health is positively associated with a higher total whole brain cortical volume in US adolescents – ABCD Study	Augusto César F. De Moraes	
198 200	Cardiovascular	Cardiovascular health is positively associated with a higher total whole brain cortical volume in US adolescents – ABCD Study Comorbidities and healthcare utilization among young adults with congenital heart defects by Down syndrome status – Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019	Augusto César F. De Moraes Vanessa Villamil	
198 200 208	Cardiovascular Cardiovascular	Cardiovascular health is positively associated with a higher total whole brain cortical volume in US adolescents – ABCD Study Comorbidities and healthcare utilization and young adults, with congenital heart defects by Down syndrome status – Congriterial Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual- and School-level factors associated with adolescent metabolic syndrome: Annuel equation modeling study	Augusto César F. De Moraes Vanessa Villamil Yu-Ting Chin	Student/PostDoc
198 200 208 220	Cardiovascular Cardiovascular Causal Inference	Cardiovascular health is positively associated with a higher total whole brain cortical volume in US adolescents – ABCD Study Comorbidities and healthcare utilization among young adults with congenital neart defects by Down syndrome status – Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual- and school-level factors associated with adolescent metabolic syndrome: A multilevel structural equation modeling study Studying the effectiveness of freem policies in reducing firearm harms using causal inference	Augusto César F. De Moraes Vanessa Villamil Yu-Ting Chin Roni Barak Ventura	Student/PostDoc Student/PostDoc
198 200 208 220 222	Cardiovascular Cardiovascular	Cardiovascular health is positively associated with a higher total whole brain cortical volume in US addescents - ABCO Study Comorbidities and healthcare utilization among young adults with congenital heart defects by Down syndrome status - Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual and school-level factors associated with addiescent metabolic syndrome: A multilevel structural equation modeling study Studying the effectiveness of firearm policies in reducing firearm harms using causal inference Errors and Their Visualization in the Calculation of the Population Artificubable Fraction	Augusto César F. De Moraes Vanessa Villamil Yu-Ting Chin	Student/PostDoc
198 200 208 220	Cardiovascular Cardiovascular Causal Inference Causal Inference	Cardiovascular health is positively associated with a higher total whole brain cortical volume in US adolescents – ABCD Study Comorbidities and healthcare utilization among young adults with congenital heart defects by Down syndrome status – Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual- and school-levef factors associated with a higher total whole syndrome status – Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual- and school-levef factors associated with adolescent netabolice syndrome: A multilevel structural equation modeling study Studying the effectiveness of finearm policies in reducing finearm harms using causal inference Errors and Their Visualization in the Calculation of the Populaton Attributable Fraction Assessing Stochastic Positivity with Convex Hulls	Augusto César F. De Moraes Vanessa Villamil Yu-Ting Chin Roni Barak Ventura Etsuji Suzuki	
198 200 208 220 222 235 235 238 247	Cardiovascular Cardiovascular Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference	Cardiovascular health is positively associated with a higher total whole brain cortical volume in US adolescents – ABCD Study Comorbidities and healthcare utilization among young adults with congenital heart defects by Down syndrome status – Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual - and School-level factors associated with a dolescent retabolics syndrome: A nutlievel structural equation modeling study Studying the effectiveness of firearm policeis in reducing firearm harms using causal inference Errors and Their Visualization in the Calculation of the Population Attributable Fraction Assessing Stochastic Positivity with Convex Hulls Formal causal inference in experimental N-c1-1 trials Interpretation of Associational Language in Research	Augusto César F. De Moraes Vanessa Villamil Yu-Ting Chin Roni Barak Ventura Etsuji Suzuki Mark Klose Marco Picclininni Noah Stovitz	Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc
198 200 208 220 222 235 238 247 247 249	Cardiovascular Cardiovascular Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference	Cardiosscular health is positively associated with a higher total whole brain cortical volume in US addiescents – ABCD Study Comorbidities and healthcare utilization among voue addius with congenial heart defects by Down syndromes status – Congenital Heart defects Individual- and school-level factors associated with addiescent metabolic syndrome: A multilevel structural equation modeling study Studying the effectiveness of finarm policies in reducing finarm harms using causal inference Errors and Their Visualization in the Calculation of the Population Attributed Fraction Assessing Stochastic Positivity with Convex Hulls Formal causal inference in experimental X-0-1 trials Interpretation of Associational Language in Research Association between referral to speciality care and patient-centered outcomes among patients with Alzheimer's disease and related dementias: an analysis leveraging physician preference instruments	Augusto César F. De Moraes Vanesas Villemil Yu-Ting Chin Roni Barak Ventura Etsuji Suzuki Mark Klose Marco Piccininni Naah Stovitz Erin Ferguson	Student/PostDoc Student/PostDoc Student/PostDoc
198 200 208 220 222 235 238 247 249 254	Cardiovascular Cardiovascular Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference	Cardiovascular health is positively associated with a higher total vhole brain cortical volume in US adolescents – ABCD Study Comotolities and healthcare utilization and with adolescent metabolic syndrome: A multilevel structural equation modeling study Idividual and school-level factors associated with adolescent metabolic syndrome: A multilevel structural equation modeling study Studying the effectiveness of firearm policies in reducing firearm harms using causal inference Errors and Their Visualization in the Calculation of the Population Attributable Fraction Assessing Stochastic Positivity with Convex Hulls Formal causal inference in experimental N-of-1 trials Interpretation of Association Language in Research Association between referrat to specially care and patient-centered outcomes among patients with Alzheimer's disease and related dementias: an analysis leveraging physician preference instruments The Utility of Missing Data Graphs in Recovering Causal Effects from Selection Bias	Augusto César F. De Moraes Vanessa Villami Yu-Ting Chin Roni Barak Ventura Etsuji Suzuki Mark Klose Mark Klose Marco Piccininni Noah Stovitz Erin Ferguson Haidong Lu	Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc
198 200 208 220 222 235 238 247 249 254 274	Cardiovascular Cardiovascular Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference	Cardiosscular health is positively associated with a higher total whole brain cortical volume in US adolescents – ABCD Study Comorbidities and healthcare utilization among young adults with congenial heart defects by Down syndromes status – Congenital Heart defects Individual- and school-level factors associated with adolescent metabolic syndrome: A multilevel structural equation modeling study Studying the effectiveness of finarm policies in reducing finarm harms using causal inference Errors and Their Visualization in the Calculation of the Population Attributed Fraction Assessing Stochastic Positivity with Convex Hulls Formal causal inference in experimental X-0-1 trials Interpretation of Associational Language in Research Association between referral to speciality care and patient-centered outcomes among patients with Alzheimer's disease and related dementias: an analysis leveraging physician preference instruments The Utility of Missing Data Graphs in Recovering Causal Effects from Selection Bias Arrests, Policing and COVID-19 Visuerability Indee Vision within Chicago, IL	Augusto César F. De Moraes Vanesa Villamil Yu-Ting Chin Roni Barak Ventura Esuyi Suzuki Mark Klose Marco Recininni Naah Stovitz Erin Ferguson Haidong Lu Allison Boretsky	Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc
198 200 208 220 235 238 247 249 254 274 276	Cardiovascular Cardiovascular Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference COVID-19 Pandemic COVID-19 Pandemic	Cardioscular health is positively associated with a higher total whole brain cortical volume in US addescents - ABCO Study Comorbidities and healthcare utilization among young adults with congenital heart defects by Down syndrome status - Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual and school-level factors associated with addiescent metabolic syndrome: A multilevel structural equation modeling study Studying the effectiveness of finearm policies in reducing finearm harms using causal inference Errors and Their Visualization in the Calculation of the Population Attributeb Fraction Assessing Stochastic Positivity with Convex Hulls Formal causal Inference in experimental N-0-1 trials Interpretation of Associational Language in Research Association between referral to speciality care and patient-centered outcomes among patients with Atheimer's disease and related dementias: an analysis leveraging physician preference instruments The Utility of Missing Data Graphs in Recovering Causal Effects from Selection Bias Arrests, Policing, and COVID-19 Vulnerability Index by Community Area within Chicago, IL Evaluating the Use of Event Metadata Extracted from Online News. Media for Disease Outbreak Detection	Augusto César F. De Moraes Vanessa Villami Yu-Ting Chin Roni Barak Ventura Etsuji Suzuki Mark Klose Marco Piccininni Noah Stovitz Erin Ferguson Haidong Lu Allison Boretsky Yannan Shen	Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc
198 200 208 220 222 235 238 247 249 254 274	Cardiovascular Cardiovascular Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference	Cardiosscular health's positively associated with a higher total whole brain cortical volume in US adolescents - ABCD Study Comorbidities and healthcare uilisation annag voue adults with congenial heart defects by Down syndrome status - Congenital Heart Study By Down Syndrome Status - Congenital Heart defects by Down syndrome status - Congenital Heart Study By Down Syndrome Status - Down	Augusto César F. De Moraes Vanesa Villamil Yu-Ting Chin Roni Barak Ventura Esuyi Suzuki Mark Klose Marco Recininni Naah Stovitz Erin Ferguson Haidong Lu Allison Boretsky	Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc
198 200 208 220 222 235 238 247 249 254 274 276 277 280 282	Cardiovascular Cardiovascular Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference COVID-19 Pandemic COVID-19 Pandemic COVID-19 Pandemic COVID-19 Pandemic	Cardiovascular health is positively associated with a higher total veloce brain cortical velume in US adolescents – ABCD Study Comorbidities and healthin are utilization many young adults with congenital heart defects by Down syndrome status – Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual and school-level factors associated with adolescent metabolic syndrome: A multilevel structural equation modeling study Studying the effectiveness of finearm policies in reducing finearm harms using causal inference Errors and Their Visualitation in the Calculation of the Population Attributed Factorin Assessing Stochastic Positivity with Convex Hulls Formal causal inference in experimental N-of-1 trials Interpretation of Associational Language in Research Association between referrat to specialty care and patient-centered outcomes among patients with Alzheimer's disease and related dementias: an analysis leveraging physician preference instruments The Utility of Missing Data Graphs in Recovering Causal Effects from Selection Bias Arrests, Policing, and COVID-19 Vulnerability Index by Community Area within Chicago, IL Evaluating the Use of Event Metadatian Online News Media for Disease Outbreak Deuterion Risk of Incident Rheumatoid arthritis in Post COVID-19 Infection: A systematic Review and Meta-analysis of Cohort Studies Influenta Vaccination Rates Before and During the COVID-19 Pandemic in the USA Anovel method for the classification of medical environment Fatures in COVID-19 research	Augusto César F. De Moraes Vanessa Villamil Yu-Ting Chin Roni Barak Ventura Etsuji Suzuki Mark Klose Marco Piccininni Noah Stovitz Erin Ferguson Haidong Lu Allison Boretsky Yannan Shen Amarit Tansawet Lasata Shrestha Edwin McCulley	Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc
198 200 208 220 225 235 247 249 254 276 277 276 277 280 282 283	Cardiovascular Cardiovascular Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference Causal Inference COVID-19 Pandemic COVID-19 Pandemic COVID-19 Pandemic COVID-19 Pandemic COVID-19 Pandemic COVID-19 Pandemic	Cardiosscular health is positively associated with a higher total whole brain cortical volume in US adolescents - AECO Study Comorbidities and healthcare utilization among young adults with congenital heart defects by Down syndrome status - Congenital Heart Survey to Recognize Outcomes, Needs, and wellbeinG (CH STRONG), 2016-2019 Individual and school-level factors associated with adolescent metabolic syndrome: A multilevel structural equation modeling study Studying the effectiveness of finearm policies in reducing finearm harms using causal inference Errors and Their Visualization in the Orgolation Attributes Fraction Association Studies in educing finearm harms using causal inference Formal causal inference in experimental Nof-1 trials Interpretation of Associational Language in Research Association Studieven referral to speciality care and patient-centered outcomes among patients with Alzheimer's disease and related dementias: an analysis leveraging physician preference instruments Association Studies of COVID-19 Vinearbility Index by Community Area within Chicago, IL Evaluating the Use of Event Metadata Extracted from Online News Media for Disease Outbreak Detection Risk of Incident Rheumatol attrihits in Post COVID-19 Infection: A Systematic Review and Meta analysis of Cohort Studies Influenza Vaccination Rates Before and During the COVID-19 Infection: A Systematic Review and Meta analysis of Cohort Studies Influenza Vaccination Rates Before and During the COVID-19 Pandemic in the US: a national-level study (2017-202)	Augusto César F. De Moraes Vanessa Villamil Yu-Ting Chin Roni Barak Ventura Etsuj Suzuki Mark Klose Marco Piccininni Noah Stovitz Erin Ferguson Haidong Lu Allison Boretsky Yannan Shen Armart Tansawet Lasata Shrestha Edwin McCulley Marissa Wold	Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc Student/PostDoc
